## TO: Mental Health Royal Commission Establishment, Department of Premier and Cabinet, GPO Box 4509, Melbourne Victoria 3001

## **RE: Royal Commission into Mental Health Terms of Reference Consultation**

The irrefutable foundational facts premising my recommendations are:

Mental health falsely implies 'mental-illness', and is a deliberate misnomer promulgated by the psychiatrist industry, solely for money; not for healing.

This heinous, malevolent ruse; is deliberately and fraudulently concocted by psychiatrists as a deceitfully calculated false human illness-state that not merely implies, but actually states, that if normal living challenges impact humans, that means the mind is biologically diseased and in a state of biological mental illness.

Psychiatrists fraudulently state that the mind is biologically diseased and in a state of biological mental illness, solely to provide personal revenue generating income from:

- a. provision of psychiatric profit making business-motivated services and,
- b. pharmaceutical corporation financial rewards, kickbacks and further greater revenue generating income from sale of lethal, neurotoxic poison drugs that cause orders of magnitudes of mass pandemic-scale deaths and illness and,
- c. further greater profit-generating income from the high revenue-generating humanexperimentation saleable research data on the major debilitating impacts directly caused by these lethal, neurotoxic poison drugs they push.

This fraud of mental illness is solidly proven by scientific, massively replicated evidence, and is not a naturally occurring phenomenon as any biological disease failure is, and cannot be proven to exist as a biological disease in any way whatsoever or at any level of biology. This scientific fact belies the psychiatrist industry as making any worthwhile contribution whatsoever to humanity; psychiatry is wholly destructive and mass kills and maims greater than Cancer, Heart, Roads, Heroin, ICE, Cocaine.

Per your call for terms of reference submissions on how to improve the killing, harming destructive mental health system in Victoria, I make the following formal recommendations to form the terms of reference:

## **RECOMMENDATIONS:**

The Victorian Mental Health Act 2014 was written by psychiatrists, this act gives ALL registered psychiatrists unchallengeable and utterly whimsical personal powers to declare any person is mentally ill, that they a risk to themselves or others, that they do not possess the mental capacity to understand that they are mentally ill and that they must be forced into a psychiatric hospital. This unchallengeable forced psychiatry power strips ANY person of ALL human rights, ALL legal rights and ALL civil rights and no legal processes exist to legally challenge this whimsical declaration power which on MOST occasions is fraudulent. The fact that that is pure fraud is borne out by the undisputed evidence that the state of Victoria has 115% more draconian and brutally violent 'Forced Admissions' to psychiatric wards than comparable states. This scientific fact demonstrably proves this fraud can ONLY be concocted for revenue generating measures by psychiatric staff, because Victoria CAN NOT possibly have 115% more suicidal, homicidal or violence risk, harm risk, to self or others existing than in the general population.

This Victoria 'Forced Admissions' rate is a statistically proven impossibility. The massive financial remunerations flowing to psychiatrists with unchallengeable powers to force people into psychiatric wards is a profound financial, moral and ethical conflict of interest. The psychiatrist's wellbeing lifestyle, career and affluence is improved by forcing people into psychiatric wards, and forcing drugs and ECT treatments upon them, a massive incentive and inducement to kill and harm; the pandemic condition our society now has.

Commission foreshadowed this evil of the hospital-centric approach where states now gallop for funding and blatantly lie that people have mental illness so as they can parasite \$1.3Million-dollars per patient per year by FORCING people into violent treatments and make massive further revenues from FORCED human drugs experimentation on sale of drugs research data. Forced psychiatrist admissions and forced psychiatrist treatments are in full violation of the (Australian ratified) <u>U.N.</u> <u>Convention on the Rights of persons with Disabilities</u> (CRPD).

 RECOMMENDATION: There is no place in any functioning healthy society for ANY forced medical regime treatments whatsoever. It does not exist in ANY other branch of medicine. The Victorian mental Health Act MUST be abolished and ALL forced forms of forced admissions and treatments MUST be abolished.

2012 Pandemic-level psychiatrist-caused death rates (<u>ABS statistics, 2017</u>) of circa 80,000 now occur. Horrifically, half of '<u>ALL</u>' national mortality in these tragic pandemic-scale deaths, are where psychiatrist mental-health prescription-drugs are involved. These deliberate psychiatrist-caused pandemic-scale deaths exceed deaths from Heroin, ICE, Cocaine drugs and deaths from Cancer, Heart, and Roads.

 RECOMMENDATION: For such psychiatrist-caused preventable, pandemic-scale death rates the Royal Commission must examine and report on the exact drugs taken by deceased, and name the prescribing psychiatrist and/or medico diagnosing the specific medical condition alleged.

Coroner's reports completely conceal the horrific psychiatrist-caused Australian mortality rates which is much higher than reported. These coroners do no investigations whatsoever other than state the IMMEDIATE cause of death (eg heart failure), totally concealing the death rates where lethal neurotoxic drugs are in the deceased that are the root cause of the heart failure causing death.

 RECOMMENDATION: All coroner's reports must state if a death occurs if ANY lethal neurotoxic drugs are present, the exact drugs taken by deceased, and name the prescribing psychiatrist and/or medico diagnosing the specific medical condition alleged. Pandemic-level draconian and brutally violent 'Forced Admissions' to psychiatric wards (156,118 nationally in 2016) is routinely done on the whimsical, unsupported false statements of psychiatrists where no suicidal, homicidal or violence risk, harm risk, to self or others exists, is apparent or even mild. Moreover, there is no regime in place whatsoever, whereby such alleged risk is real, documented, witnessed, corroborated or evidence based, it is merely a whimsical psychiatrist opinion. As an Advocate, scrutinising thousands of case files, repeated evidence demonstrably shows these alleged risks decisions have no substantive merit whatsoever and reveal a massive bias towards procuring admissions solely for personal and hospital revenues. This fraudulent forced admissions rate is so extreme that the state of Victoria has 115% more draconian and brutally violent 'Forced Admissions' to psychiatric wards than comparable states. This scientific fact demonstrably proves this fraud can ONLY be concocted for revenue generating measures by psychiatric staff, because Victoria CAN not possibly have 115% more suicidal risk, homicidal risk, violence risk, harm risk to self or others; existing than in the general population. This Victoria 'Forced Admissions' rate is a scientifically statistically proven impossibility.

RECOMMENDATION: For ANY 'Forced Admissions' to psychiatric wards, ANY alleged suicidal risk, homicidal risk, violence risk, harm risk, to self or others MUST be IMMEDIATE, IMMINENT, a direct serious threat to life and limb, an immediate dire personal threat or implied serious statement to act and fully verified by FULL documentation of statements, witnesses, recordings, video that DEMONSTRATE an IMMEDIATE, IMMINENT, a direct serious threat to life and limb would occur unless THIS action was taken; AND when there are no less draconian and/or restrictive alternatives available

Regulatory and professional responses into reports of harm done by psychiatry and serious adverse drug reactions are only voluntary and conceal massive deaths and harms.

 RECOMMENDATION: Regulatory and professional responses into reports of harm done by psychiatry and ALL serious adverse drug reactions must be MANDATORY.

The pandemic scale of iatrogenic deaths and harms that is psychiatric-drugs induced disorders is leaving a large population that is brain-damaged, will never work again, who need 24-hour care and who are now fully dependent upon of disability pensions and services. Mental illness is a complete fraud, current mental illness definitions lump mental illnesses together with, drug and alcohol abuse, substance abuse and normal human unhappiness and stresses or challenges of life; all under the same fraudulent mental illness umbrella. Psychiatrists prescribe for children, nine drugs that have never been approved for children. They prescribe for undefined depression, which could be merely transient after the death of a family member or the dog. They diagnose ill-defined psychosis that lasts more than 24 hours and most of this fraudulently diagnosed psychosis in children is stress induced or psych-drug induced which indicates that they are unlikely to metabolise lethal, toxic drugs used in psychiatry.

This must be fraud. The fraud is exemplified by the facts that so-called pharmacologically treated depression affects 4% of the population, as **series** Professor **states** Professor **states** in the first guideline to the (inevitably pharmacological) treatment of depression. The fraud is, **series** in this statement is citing emotion, not a medical or biological disease. Psychiatrists and medicos prescribe like this because they have a MASSIVE conflict of interest and are corrupted and paid by the pharmaceutical industry and with government approval.

 RECOMMENDATION: The Royal Commission must investigate institutional, professional and regulatory revenues, money flows, remunerations, kickbacks, and inducements linked to the pharmaceutical industry. It must also investigate these money flows to psychiatrists and medicos prescribing neurotoxic drugs and to universities, research institutions, and clinics involved in ALL psychotropic drugs prescribed. ALL corporate pharmaceutical funding flowing to these organisations must be stopped.

Psychiatry is fraud, no greater fraudulent or dangerous male exists in Australia than He is not content to preside over <u>the most destructive psychiatric killing-</u> <u>maiming regime in Australia</u>, he malevolently targets our next generation of children for his evil, bogus quackery that kills and damages on this pandemic scale. The most be examined to see how many he has killed in his numerous clozapine experiments, this man brags on his CV he has been involved in at least S Million dollars of financial transactions that involve lethal, psychotropic neurotoxins and/or corrupt pharmaceutical corporation funds (BRIBES).!

He MUST be completely removed from any and ALL connection to this Royal Commission due to his fraudulent, bogus quackery and MASSIVE corrupt conflict of interests by pushing psychotropic neurotoxin drugs and taking financial bribes from these corporations to push their lethal poisons. No psychiatrist must participate in this Royal Commission in ANY way due to their conflict of interest.

I refer you to the following signed petitions now publically taking support:
