

Whist a Royal Commission promised of all its' recommendations, is or could be seen as a confidence in the commissioners and its' processes, we cannot neglect the situation of which it is made.

The situation, I state affirmatively, is and has been for decades, liken to a political responsibility put on the back burner, and is burning.

There cannot be a proper resolution of wholesale pass off to Psychiatry, with their own idioms or secret agendas, if it has no proper checks or even balances. Law is no sanction of ill, until 40 years hence.

No enquiry, no proper research.

We have heard the occasional family empowered to dig up the truth, 'the system killed our child.'

"An angel at my table."

Chelmsford,

These three say what?

I cannot properly comment even on that closely resembling a genocide, with some spared only by chance.

I have wondered, if the Nazi Holocaust of the mentally ill were kind, at times.

One cannot dwell, BUT many are caught, RIGHT NOW, by hideous abuse and mistreatment.

I cannot forget my sister, who is still in hospital with other who are off their heads, after 5 whole years.

How can this be healthy?

I will not be party to an ideation of perfected system, when Rome is still burning.

I am not alone in this immediate call for financial relief for the system.

Apart from hideous human betrayal, hubris and bigotry, there are people that require real help right now.

Who knows about this Abyss?

A Government promised to institute all the recommendations of the Royal Commission into the Mental Health System.

I call for an immediate supply of funds, NOW.
