

2019 Submission - Royal Commission into Victoria's Mental Health System

SUB.0002.0026.0026

Name

Ms Initially No

What are your suggestions to improve the Victorian community's understanding of mental illness and reduce stigma and discrimination?

Honest feedback about a system of injustice, depravity, assault and government sanctioned violations, is given every time a person is forcibly subjected to psychiatry behind closed doors. Did anyone listen to the 13 thousand people put on forced psychiatry orders under the Mental Health Act of Victoria, that were arbitrarily detained, forcibly injected, and violated by other psychiatric procedures? No, the doors are closed, no one hears those screams. Victims of psychiatrists are silenced, while the Victorian government propagates lies about care, help and medicine. Victims of psychiatrists are only asking for basic human rights: our liberty, our autonomy, freedom from torture, freedom from arbitrary detention, the right to self-defence, the right to choose and refuse medical treatments, freedom of expression to invalidate the practices of psychiatrists and Mental Health coterie. Accusations [see attachment 1] that are attempts to excuse these violations written up by psychiatrists, as reasons, are not reasonable: 'Smiling inappropriately' (whose business is it to claim control another's smiling?), 'Claims to be a political prisoner' (as did homosexuals, conscientious objectors, whistle-blowers when they are subjected to forced psychiatry), 'Accuses of conspiring with others to violate her human rights' (that is exactly what the UN CRPD accuses Australia of doing!) then, a misinterpretation of what was said about psychiatry being like phrenology, a bogus pseudo-science the invading English used to exploit and murder 1st Nations people in Australia, along with other bogus eugenics that was called 'science' which psychiatry has a basis in. How on earth that translates to: 'Turns psychiatry to phrenology to aborigines being accused of bumping people off in the UK.' This is just one tiny example of insidious non-sensing of what a victims of psychiatrists has quite logically stated, that isn't an unusual or unknown piece of history. And is so regular in the files of victims of psychiatrists, that it is likely to be deliberate. This is what is being written up by psychiatrists. Does anyone ever read what is written to attempt to justify psychiatrists' exploitation of us? How on earth could a smiling inappropriately' be a reason to section a person? How on earth can this be the least restrictive' treatment for people that should not be policed for their smiles, or their dislike of psychiatrists and their treatments, or their understanding of psychiatrists' vile, cruel history that continues until the villainous practice is abolished? Improving the community's understanding of what it is like to be forcibly subjected to torture 24/7 indefinitely, to be arbitrarily detained on the basis of exploiters wanting to exploit as many people as possible, hold onto them as long as possible, then propagate the lie that it is benevolent care that requires that the Royal Commission to stop calling victims of psychiatrists victim-blaming terms like 'mentally ill'. Improving understanding requires calling the perpetrating psychiatrists and other mental health personnel for what they are vile cruel state sanctioned exploiters. Reducing stigma (a sharp pointed instrument) requires abolishing forced psychiatry so that no more needles are forced into human bodies, sticking victims of psychiatrists full of substances that mark them with tell-tale stigma: twitching, muscle stiffening, turning their abilities into disability, turning scholars into dunces, turning athletes into slobs, disfiguring the attractiveness of the person into a look of a poisoned beaten-up looking person. Equality before

the law is what we're asking for, voting rights for all victims of psychiatrists subjected to arbitrary detention, the right to self-defense against forced psychiatry, rights to personal liberty, rights to freedom of expression, rights to our own beliefs, and no more lucrative cruel forced human research via government sanction [see attachment 2 as one of many examples of human research without consent: an audit of people being subjected to forced neuroleptic depot injections paid for by a pharmaceutical company, for the profit of the those who do the forced human experimentation.] Victoria needs to Abolish forced psychiatry, comply with the UN CRPD, and then, recognise where psychiatry needs to be criminalised.

What is already working well and what can be done better to prevent mental illness and to support people to get early treatment and support?

First of all stop using the vicious DSM slur 'mental illness' it is one of the worst kinds of verbal violations that victims of psychiatrists are subjected to, forced to agree to and killed and maimed through state sanctioned forced/ coerced psychiatry under the Victorian Mental Health Act. To have financially and socially franchised people, who have not subjected to forced psychiatry get up and say these DSM labels are 'liberating' is insulting to us, when it is under the vicious DSM slurs that people have their liberty taken away, and their rights to choose and refuse medical treatment denied. There is nothing that the Mental Health Association, and Victoria's system based on that eugenicist organisation is doing but getting wealthy from the flesh of people it forcibly exploits, even those who are coerced cannot really be said to have really volunteered to have their lives taken into service for psychiatrists and their industry. Victoria's Mental Health System is a disgusting vile, cruel exploitation racket. The Mental Health system's propaganda is an insult to victims of psychiatrists and we want it gone. We don't want it reformed, remade, reconfigured, redeveloped, and certainly not expanded on we want it abolished. People who have been violently exploited by an organisation, of which the government sanctions and profits from want for the vile, cruel system, and the vile, cruel laws to be abolished. Reparations must happen. The violators must not continue to rule, and subjected the population to new terms of abuse and new human experimentation through a continuation of Victoria's Mental Health legislated forced orders. The Mental Health legislation, that allows forced psychiatry must be abolished. So many people dead, so many people maimed by forced psychiatry. So many stupid theories psychiatrists come up with and fraudulently purport as the truth, and so many diabolically cruel experiments inflicted so of course the only thing that can be done is to remove the exploitation racket. Then, victims of psychiatrists can get on with their lives, and real support, basic human needs that are actually very obvious can be talked about. Until then, talking about support for people who have been tortured, raped, brutalised, exploited none of it will be any good, because there's the Mental Health exploitation racket, waiting to procure another vulnerable person beaten up by some cruel element in society, to exploit and keep exploiting until they die. That's a horrid system, and it can never be called benevolent, the fact that so many people in authority attempt to spruik that idea, is just really such a disgusting shameful ugly way to govern. What would be positive to do is to prevent psychiatrists from exploiting people, the earlier that forced psychiatry is abolished the better. When forced psychiatry is abolished, apologising to victims of psychiatrists and assuring them that forced psychiatry will never be legislated again, will be immensely supportive to victims of psychiatrists. Abolishing arbitrary detention on the basis of accused disability should've happened in 1886, which was Victoria's previous Royal Commission into the profiteering and to-do of those proprietors who wanted to procure human research specimens, live, and then their corpses after death for 'science'. This vile, cruel era of exploiting people like that should've ended then, in 1886, instead this horror has been allowed to expand, reform, cover-up, and parade out propaganda. If I hear another Mental Health Worker attempting to speak over me, to tell me that there are people

wanting to get into hospital beds, and that there are people who have a 'good relationship' with their psychiatrist, I'm going to laugh. And I'm laughing because how can a perpetrating Mental Health Worker, speak for those they perpetrate against, and talk down those who have experienced being perpetrated against by Mental Health workers? How can they get away with it? And then write my laughter up as inappropriate. It is they, who are inappropriate, they, the perpetrators, the psychiatrists, they must not be allowed to speak for victims of psychiatrists, and claim that there are people wanting to get into their beds! That's just dirty politics. That's just denial. And when victims of psychiatrists are written up time and time again, as: denies they have a mental illness, denies hearing voices etc. And if we're denying, then that makes psychiatrists and other Mental Health Personnel accusing us of stuff we don't agree with. But what happens, psychiatrists get to detain and torture us, even though we, the victims of psychiatrists, don't agree with their accusation, don't agree with their treatment, and have better things to do, and better people to talk to that persecuting psychiatrists, who then accuse us of having 'persecutory thoughts' should we voice that they are persecuting us.

What is already working well and what can be done better to prevent suicide?

Stop allowing psychiatrists to force themselves on people, stop forcing drugs into people, stop forcing psychiatrists' procedures on people. Human research, where people were forcibly injected with neuroleptics 'initiated in hospital and while the patient was under compulsory treatment (85%)'. The rest, were coerced, under threat of force. This research was conducted by The Program Manager, at a psychiatric facility and funded by a pharmaceutical company. How is that fitting with ethics? Oh, that's right, the diabolical psychiatry is allowed to have their own ethics committee, because they have insurance. Okay, then, where's the compensation for those forcibly subjected to human research against their will? Listen to victims of psychiatrists. Stop allowing people to be violently abused by psychiatrists and Mental Health personnel, stop protecting those medical practitioners and other authority figures who violate. Stop allowing the Mental Health system to exist as a way to silence people speaking out against violations, corruption and other crimes. Stop allowing the perpetrating psychiatrists platforms to speak, giving perpetrating psychiatrists authority positions in this Royal Commission and awards, while denying victims of psychiatrists basic means to lawsuit perpetrating psychiatrists and challenge the psychiatric propaganda. Around 86% of people who suicide are on psychiatric drugs (in Swedish statistics and likely similar in Victoria too). Those deaths could have been prevented, because, if anyone actually listened to the people who get forced/ coerced to take psychiatric drugs will realise, is that psychiatric drugs are not only excruciatingly painful, they are debilitating, disfiguring and demeaning. Psychiatric drugs beat up a person's insides, causing decay and suffering. Just look at the list of effects on any neuroleptic drug website, or listen to a victim of psychiatrists tell you of the horrible effects, or just recognise you can see the horrifying harm neuroleptics and other psychiatric drugs cause. It is a fate worse than death being forcibly exploited as a laboratory specimen. There is not a single person who has been forced/ coerced to take psychiatric drugs that would not think that suicide might be one of the options to escape that horribly painful, dehumanising vile cruel exploitation that is forced/ coerced psychiatric drugs and other procedures. People don't enjoy being arbitrarily detained, prodded, tested and violated under government force, then told this is medical care and necessary, when it isn't anything of the kind. So stop it. Abolish forced psychiatry. Find a better way to make money other than through forced human research. Stop the vile, cruel eugenics-based exploitation racket.

What makes it hard for people to experience good mental health and what can be done to improve this? This may include how people find, access and experience mental health treatment and support and how services link with each other.

Because the Mental Health Association is a eugenics based organisation, designed to exploit and feign benevolence, the whole propaganda around the idea of Mental Health improvements is just tied up in that horrible vile cruel exploitation that is done by force. People don't want forced mental health, of any kind, they don't want the propaganda on mental health, they don't want their tax-dollars spent on funding these horrible forced/ coerced human research. Abolish forced psychiatry. Stop making people's lives hard, by pretending that the Mental Health system in Victoria is something that can be improved, that's disgusting. No one wants an exploitation racket 'improved' they want it abolished. Victims of psychiatrists don't want more and more organisations feeding off the forced human research that is Victoria's vile cruel Mental Health Act sanctions. Only when forced psychiatry is abolished, can there be any true understanding of what social supports are needed most, for people who have been injured, violated, and disenfranchised by forced/ coerced psychiatry while the system of force was in place. Until then, all there are is parasite organisations, feeding off exploiting the people who are being violently and cruelly exploited by the system of forced Mental Health treatments and arbitrary detention. Comply with the United Nations Convention on The Rights of Persons With Disabilities and abolish forced psychiatry. There should be no forced medicine and no forced human research in the guise of emergency medicine, if Victoria were to be abiding by International Law. Victoria's Mental Health Act 2014 is unlawful under International Law Australia has agreed on, hurry up and end the long history of human rights abuse under Victorian government sanction.

What are the drivers behind some communities in Victoria experiencing poorer mental health outcomes and what needs to be done to address this?

Forced Psychiatry drives people into being further financially and socially disenfranchised, than they would have been without being subjected to forced psychiatry. Forced Psychiatry is state sanctioned killing and maiming, it is unlawful internationally and should be a crime in Australia, instead of a government sanctioned exploitation racket. Exploitative, vile cruel systems of Mental Health, have no place in any of our Victorian communities. Stop the eugenics scam that is Mental Health, no more of it. Mental Health propaganda and the system of forced Mental Health treatments that legislate use of force are the problem. Stop pointing at communities and targeting people for whatever reason that someone thinks they can accuse another's mentality of being 'poor'. There's way too much racism, misogyny and prejudice in psychiatry and every Mental Health program and system in Victoria that's a problem. The other problem is that the government allows the inflicting of vile, cruel human research on people, and propagates the idea of calling it care and help, and targets communities that are financially disenfranchised through hardship and exploitation, targets people who are isolated due to sensitivity to pollutants that the government has not regulated enough in Personal Products, then labelling victims of psychiatrists with vicious DSM slurs, calling them 'burdens' even though it is their flesh is being used, their live body is being put forcibly into service for parasitical psychiatrists who get paid a ridiculously large sum of money from tax payers to exploit people.

What are the needs of family members and carers and what can be done better to support them?

What any decent person needs for Victoria to do is abolish forced psychiatry. It is very necessary that this happen now, and that there are no more delays in eliminating the government sanctioned exploitation racket that is the Mental Health Act 2014, that enables other kinds of exploitation and

abuse to be perpetuated. Reparations are what we need. Reparations as in validation that our loved ones were murdered by psychiatrists and the system of forced mental health treatments, that they were sent to psychiatrists to cover-up for other kinds of crime, and exploitation (some of which has now been semi-exposed and validated). Note also some family members and those that claim to be 'carers' are actually guilty of abuse and victims of psychiatrists are denied equality when attempting to speak out against it. Those family members and supportive friends (who don't call themselves 'carers' any more than victims of psychiatrists call themselves 'consumers') that speak out against the diabolical disgusting system of forced psychiatry say exactly what victims of psychiatrists say needs to happen: abolish forced psychiatry.

What can be done to attract, retain and better support the mental health workforce, including peer support workers?

There shouldn't be a mental health workforce that forces themselves on people, helping themselves to people. There just shouldn't be a Mental Health system, there shouldn't be any such eugenics-based system in Victoria. It's disgusting that this horrible legislated vile, cruel procuring of live humans for invasive human research has gone on so long. Victims of psychiatrists, are not interested in Peer Support Workers that are employed in a system of forced psychiatry, whereby they are not in any way anything more than turncoats. It is horrible to be betrayed by such people. There needs to be access to justice, so that people who have been violated by psychiatrists, exploited for human research, can get reparations for the needs that have been caused by forced psychiatry, that are known to be caused by forced psychiatry, so well known, that the drug companies list the effects of their drugs, and the ECT manufacturers are forced to list such things as their machines causing brain damage. So, why on earth are psychiatrists still forcing upwards of 700 people per year forcibly to ECT? And with over 13,000 forced psychiatric orders last year, that means 13,000 forcibly subjected to drugs they do not want to take, to interrogations with psychiatrists whose soul intent is to write them up as a symptom, not matter what the person says, it will be written into some cobble, that accuses the person of some medical condition, until, the person is broken under the forced drugging, detention, tying up on a bed, isolating, deprivation etc. Then, once the person decides to agree to everything the psychiatrist says, and say that the treatment is good for them, the psychiatrist writes the person up as better due to the medication. That's really vile medical fraud. And it can be proven with files, from anyone who has been subjected to forced psychiatry. A file spanning 14 years (such as my own) shows this pattern of fraud and violation each time I was subjected to arbitrary detention in a psychiatric unit, forcibly injected, and subjected to numerous violations, deprivations. The only worthwhile Peer Workers, are people that are actually peers. And who are they when you're wanting support to get free from forced psychiatry? Who are they when you want back-up to talk about electronic interference, or toxins in food and air? Who are they when you're being denied visitors? Who are they when forced acuphase has left you with dystonia? They're not someone who tells you that you've got to agree with what the psychiatrist says, hands you a book of rights that says you have no rights, then schools you like in a dumbed-down manner, then tells you there's no lawyers available. If forced psychiatry was abolished, there would be people with lived-experience of homelessness, assisting people with housing. People with lived-experience of chemical sensitivity assisting you to negotiate fume free environments, and gain better regulation of toxic industries and products. People with lived-experience of forced psychiatry, supporting people who need to gain their lives back, after the diabolical regime has ended, to withdraw from the toxic drugs they were forced/coerced to suffer. All that, and so much more. How arrogant it is, to have a perpetrating psychiatrists sitting in commissioner and chair positions in the Royal Commission, and denying people that have been actively protesting peacefully at parliament, who are victims of

psychiatrists, denying that we exist. Denying us justice. Denying that forced psychiatry is only perpetrated against those who have already been disenfranchised by some other mean aspect in the community, to then be further perpetrated against by forced psychiatry is just disgusting, then to attempt to deny that yet again. The Royal Commission in 1886 was more honest in the understanding of how vile the exploitation of people subjected to arbitrary detention and forced treatments is, how profitable for the proprietors of the institutions, and how nebulous the reasons for targeting the person were, as well as how utterly corrupt the institutions were in their want to keep exploiting people. Though, that too was a Royal Commission designed to gain profits for exploitative medico research. Ever heard of the term 'revolving door patient' this is what it means: A person is violently exploited by psychiatrists in a point in their life where they are vulnerable, and disenfranchised, and the moment the person gets free and starts to speak out against what the psychiatrists did to them, they are detained again and violently exploited. It is not easy to get away from being disenfranchised while you're being subjected to forced psychiatry you're not even able to drive! And, if you continue to be connect to Centrelink or any Community Housing, or any kind of social support, you are seen as someone who can have CATT called on you, for smiling cheekily, or not supporting someone's religion, or reporting a social worker for a code-of-conduct violation, or just because psychiatrists need more numbers on one of their human research projects and they don't want you to be 'lost to follow-up' or if you are they want to teach you that you can never get away. But, you can get away from psychiatrists, and you can speak out against them, it's just that you cannot do that while you're disenfranchised, without horrible consequences. And you cannot be a Peer Worker, employed at an organisation that is connected to any of the peer support organisations that get funding from government, because the minute you start speaking the truth, you get your contract terminated.

What are the opportunities in the Victorian community for people living with mental illness to improve their social and economic participation, and what needs to be done to realise these opportunities?

Abolish forced psychiatry and then, people will be free from being exploited in this vile, cruel way. Those parasites who have thrived from human flesh, such as psychiatrists and their coterie don't deserve more opportunities. Most psychiatrists deserve to be jailed and have their assets frozen and spent on reparations for victims of psychiatrists that have been injured physically, financially, as well as had their childhood taken, their fertile years taken, their potential careers taken into a horrifying violating servitude. The corruption of medicine is rife, but the worst is psychiatry, which isn't even a viable medical industry and would not exist without the utilisation of government legislation that allows for the use of force. These human rights violators must be sent a stern message, so that psychiatrists' violations will cease. There must be no more allowances for medicine to run exploitation rackets in Victoria. We want total compliance with the UN CRPD. Psychiatrists and their violating Mental Health personnel and industries need to be broken. For so many years victims of psychiatrists have been arbitrarily detained and tortured with psychiatric drugs and procedures until they are broke into obedience and compliance with the horrifying violations inflicted on them, then, lured into being turncoats to their fellow victims of psychiatrists, turncoats to their own people. No more of that. Break the perpetrating psychiatrists and coterie and their invasive cruel lucrative forced human research racket, so that Victorians will no longer have to fear speaking out against violators, exploiters, corruption, child abuse, crimes committed by those in power and authority, pollution, fraud and all that gets hidden when people get dragged off, arbitrarily detained and tortured into silence via the Victorian Mental Health Act 2014. No one

deserves forced psychiatry no one. Stop the violent silencing of victims of psychiatrists.

Thinking about what Victoria's mental health system should ideally look like, tell us what areas and reform ideas you would like the Royal Commission to prioritise for change?

1. Abolish forced psychiatry/ forced medicine/ forced mental health and any detention on the basis of mental health/ psychiatrists' accusations. Detention must be court proven and crime-based, not an accusation of 'mentality'; and forced medicine, and forced invasive cruel human research is unlawful under International law (UN CRPD).
2. Criminalise psychiatry and recognise the hate- crime involved with psychiatrists' DSM terms.

What can be done now to prepare for changes to Victorias mental health system and support improvements to last?

There is no way anyone should endeavour to improve an exploitation racket, such as forced mental health treatment under the Victorian Mental Health Act 2014 is, unless you're an evil dictator of human lives. What needs to happen is

- A legislated abolition of forced psychiatry in Victorian, and push for a Federal Act, similar to the Abolition of the Death Penalty (though it would need to be The Abolition of Forced Mental Health Treatments, Forced Psychiatric treatments and arbitrary detention on the basis of mental health diagnosis.)
- Give people a chance to speak out against the worst bloody psychiatrists' violations
- Ensure victims of psychiatrists' bloody violations, with reparations such as apologies and condemn the era of forced psychiatry.
- Criminalise aspects psychiatry that no one should be coerced into, and no parent should be allowed to force their child to submit to, and no adult should ever have to be forced into. What can be done now to prepare for abolition of Victoria's invasive cruel forced human research racket:
- First of all there needs to be an exposing the psychiatrists' bloody violations. Let victims of psychiatrists speak out against psychiatry. Expose the exploitation racket that is the mental health system, bring the horror of the invasive human research to a wide audience and tell that audience how many people in Victoria have been maimed and killed and how it was covered up with propaganda.

Is there anything else you would like to share with the Royal Commission?

Exposing the violations that victims of psychiatrists have suffered, how many people have been maimed by forced/ coerced psychiatry is not an action finalised. Until the legislated exploitation ends, people will continue to be violated, and the Victorian government will continue to be an outrageously cruel human rights violator, allowing state sanctioned vile cruel lucrative exploitation. What is needed to be done is to Abolish forced psychiatry. Victims of psychiatrists and allies have been asking to abolish forced psychiatry, asking that since forced psychiatry first existed. It is time now to stop attempting to lie that this state sanctioned assault and battery is in any way of benefit to the person that is being subjected to forced psychiatry.
